

Digital Output Relay Kit & Harness	
Description:	The Digital Output On/Off Relay Kit is a pre-wired relay and fuse block to be used with PE3 Series ECUs. The kit has a max current capacity of 15 amps, and can be used to control your cooling fan, fuel pump or water pump.
Uses:	The Digital Output Relay kit can be used to control most On/Off devices including: <ul style="list-style-type: none"> • Cooling fans • Fuel pumps • Water pumps

Example	PE3 Monitor Configuration
<p>Fuel Pump Control</p> <ul style="list-style-type: none"> • Fuel pump is set to prime for 6 seconds when power is applied to PE3 ECU. • Fuel pump will be active only when RPM is detected. 	

Wire Color	Connection Details
Orange/Blue 20ga	Relay control. Includes PE3 connector pin.
Red 14ga	Battery Positive.
Yellow 14ga	Positive side of device being controlled.

Notes
<p>Relay used is directional. If installed incorrectly, the relay will be damaged. Line up silver mark and dimple as shown on relay with silver mark on relay housing. See above images for correct installation.</p> <p>Replacement relays (Part # 52020003) can be ordered from Performance Electronics.</p>
