Position: Mobile Developer (Cincinnati, OH)

Description: As a Mobile Developer, you will be part of a cross-functional team, applying your skill, experience, and creativity towards building complex and scalable mobile application solutions. You will work in a highly collaborative environment, solving exciting problems using modern technology while leveraging best practices. The product development team works full-stack and owns the entire product from enterprise to mobile to embedded systems. Please note: The company will not sponsor a Visa for this position.

Company Description: Performance Electronics, Ltd (PE) is an engineering company specializing in the design and manufacture of embedded electronic control systems for various industries. PE has extensive experience in all aspects of control system design, integration, testing, and production.

Responsibilities and Duties:

- Design and build applications for iOS in Swift and SwiftUI.
- Maintain existing Android apps in Kotlin and Java.
- Deploy new and updated applications via Apple App Store and Google Play.
- Ensure the performance, quality, and responsiveness of mobile applications.
- Collaborate with Enterprise and Embedded Software teams to define, design, and ship new features.
- Identify and correct performance issues and bugs.
- Help maintain code quality, organization, and automation.
- Gather requirements and provide accurate and realistic project milestones and timelines for completion.
- Create and maintain technical documentation for mobile applications.
- Suggest new features and expansion of existing apps to improve performance and reliability.
- Complete deliverables per schedule and clearly communicate any changes in deadlines as soon as possible.

Minimum Requirements:

- 2-5 years of professional experience in iOS application development.
- Bachelor's degree in Computer Engineering or Computer Science.
- Desire to work with Android mobile applications.
- Familiarity with Bluetooth Low Energy connectivity.
- Highly motivated self-starter with a passion to develop high quality applications.
- Familiarity with graphic design tools to edit icons and images for use in apps.
- Familiarity of development in a software design life cycle.

Compensation & Benefits:

Salary: $75,000.00 - $90,000.00 per year, commensurate with experience.

Benefits: 401(k) with match, medical, dental, vision insurance, life insurance and long-term disability, paid time off, flexible schedule, casual work environment.

How to Apply: Email your resume and cover letter to: HR@pe-ltd.com.
